

Smart Plug

Smarter than the average plug

Set up for less vampire power

Connect your appliances to smart plugs and switch them off from your phone when you're about to leave the house or go to sleep.

Run appliances, even when you're away.

Use your cheaper electricity to wash or dry your clothes. Connect your appliances and switch them on even when you're away from home. Clean and dry clothes with less effort, and less costs!

Secure your home from intruders.

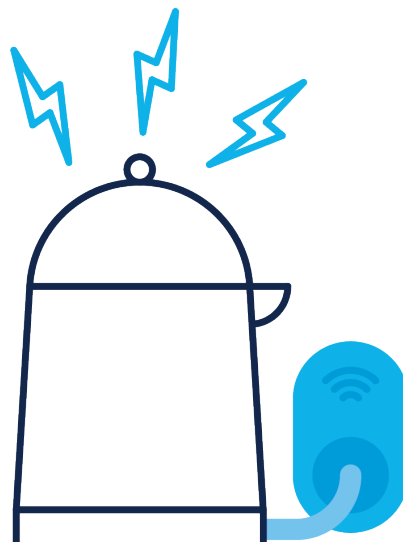

Going away over the weekend or heading overseas for a holiday? Connect your lamps

to a smart plug. Schedule lights to come on at night and create the illusion of activity.

Pinpoint energy hungry appliances.

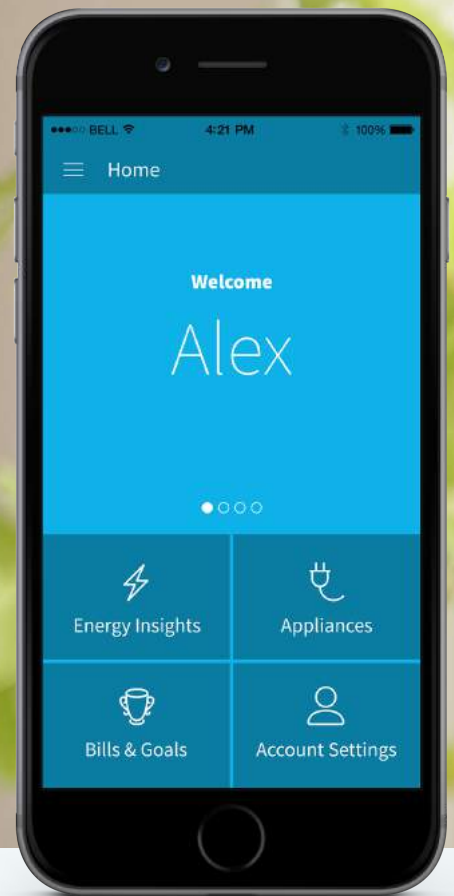

Unsure of what's using the most electricity? Plug in one appliance at a time and track how much each appliance consumes. Then you can see if it's time for an upgrade, or if you need it checked out for a service.

**Convenience at
your fingertips**

Use your Smart Plug with
the carbonTRACK app.

Measure and control energy

Monitor your connected appliance's energy use in Watts and Watt-hours from your phone, tablet or computer.

Easy savings

Shave up to 10% off your electricity bills by cutting out standby power.

Quick install

After you have your carbonTRACK Smart Hub set up, simply plug the Smart Plug into a wall socket, then pair it with the app. Now you're ready to start switching and saving!

**Start with a
carbonTRACK Smart Hub**
